

Leverage PMI Certifications Support Careers and Companies

Tue Feb 15, 2022 6:00 PM - 8:00 PM CDT

Description:

Certifications are everywhere. All are not equal! The Project Management Institute (PMI) offers certifications that stand out by affirming experience, execution ability, and an earnest commitment to being a lifelong learner.

Agility entered the PMI canon in-force two decades ago with the inaugural Agile Certified Practitioner certification. This generalist certification surveys the breadth of agile frameworks and toolkits. The PMI-ACP prepares all to see agile with pragmatism guided by stated process agnosticism, "Tailor the Process! One size doesn't fit all!" PMI now recognizes distinguished Agile specialty roles with Disciplined Agile.

The PMI certification suite (including the Agile certification suite) is ready to support digital transformations of any size. Come to this session to join a simulation planning the training and PMI certifications to support a digital transformation at a large company.

The session will be a live-virtual working session. The tools used will be Zoom and Miro (an online virtual environment). Attending on a two-screen setup with a mouse and investing one hour in exploring the online virtual environment at Miro.com is recommended. Miro tutorials are available there for free.

Learning Objectives

- Learn about PMI Certifications
- Understand application of PMI Certifications to holistically support a Digital Transformation
- Identify Certifications aligned to career aspirations and company needs

Working in a Group to Solve a Knotty Problem

Live Virtual Zoom Rooms and Miro Boards

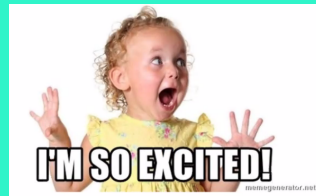

Best to have two screens (Share and Browser)

Please please please

Fear not!

Come and join this board now!!

Project Management Professional®

PMIP® certification is the gold standard in project management. Recognized and demanded by organizations worldwide, the PMP® validates your competence to perform in the role of a project manager, leading and directing projects and teams.

[Discover the PMP Certification Advantage](#)

Certified Associate in Project Management (CAPM)®

CAPM® certification demonstrates your understanding of the fundamental knowledge, terminology, and processes of effective project management.

[Discover the CAPM Certification Advantage](#)

PMI Professional in Business Analysis (PMI-PBA)®

PMI-PBA® certification highlights your expertise in business analysis. It spotlights your ability to work effectively with stakeholders to define their business requirements, shape the output of projects, and drive successful business outcomes.

[Discover the PMI-PBA Certification Advantage](#)

Program Management Professional (PgMP)®

PgMP® certification is designed for those who manage multiple, complex projects to achieve strategic and organizational results.

[Discover the PgMP Certification Advantage](#)

Portfolio Management Professional (PFMP)®

PFMP® certification recognizes the advanced experience and skill of portfolio managers. The PFMP demonstrates your proven ability in the coordinated management of one or more portfolios to achieve organizational objectives.

[Discover the PFMP Certification Advantage](#)

PMI Risk Management Professional (PMI-RMP)®

PMI-RMP® certification demonstrates knowledge and expertise in the specialized area of assessing and identifying project risks along with plans to mitigate threats and capitalize on opportunities.

[Discover the PMI-RMP Certification Advantage](#)

PMI Scheduling Professional (PMI-SP)®

PMI-SP® certification recognizes demonstrated knowledge and advanced experience in the specialized area of developing and maintaining project schedules.

[Discover the PMI-SP Certification Advantage](#)

PMI Project Management Ready™

The PMI Project Management Ready™ introduces the high school and post-secondary students to the concepts and skillsets of project management.

PMI Agile Certifications

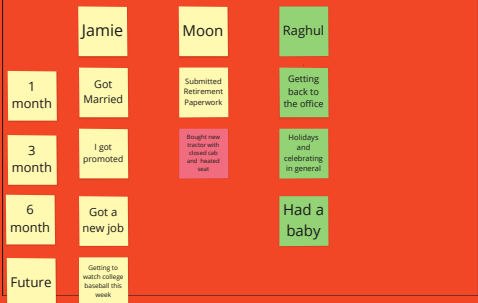

Our Agile certifications span beyond any single approach—it's about tailoring your way of working to your unique situation.

The diagram shows a central circle 'Journey to Business Agility' connected to six certification paths, each with a PMI logo and a description of the certification's focus and requirements.

- DASH DISCIPLINED AGILE SCRUM MASTER**
 - 0 years Agile experience
 - Self-paced or 2-day training
 - Pass an exam
- DASSM DISCIPLINED AGILE SENIOR SCRUM MASTER**
 - 2 years Agile experience
 - 2-day training
 - Pass an exam
- DAVSC DISCIPLINED AGILE VALUE STREAM CONSULTANT**
 - 3 years Agile experience
 - Disciplined Agile Senior Scrum Master certification
 - 2-3 day training
 - Pass an exam
- DA COACH DISCIPLINED AGILE COACH**
 - 3 years Agile coaching experience
 - Disciplined Agile Senior Scrum Master certification
 - 2-3 day training
 - Pass an exam
- ACP AGILE CERTIFIED PRACTITIONER**
 - 8 months Agile experience + 1 year general project experience
 - 21 hours training
 - Pass an exam
- PMI AGILE CERTIFIED PRACTITIONER**
 - 8 months Agile experience + 1 year general project experience
 - 21 hours training
 - Pass an exam

The Savage Summary Game

Room 1

Rules of the game

You will be assigned a Breakout room by Zoom (Room 1 to 4)

In your room appoint a scrum Master.

Go around to each person and ask, "What was something good that happened last month?"

Create a Savage Summary Card

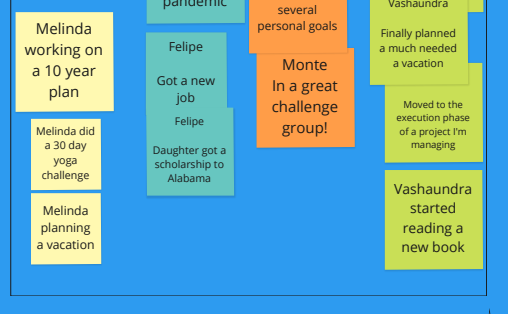

After 10 min we will rejoin the main room

Each Scrum Master will get 2 min to tell their team's story

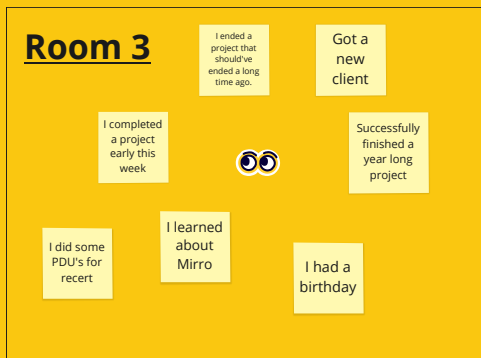

Good detail about each person's 'Something Good' is the target for presenting Scrum Masters

We will vote on the winning room!

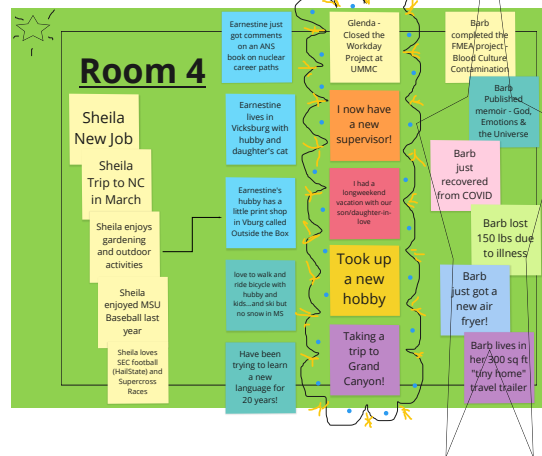

Room 2

Room 3

Room 4

Room 1

Jamie

Moon

Raghul

1
month

Got
Married

Submitted
Retirement
Paperwork

Getting
back to
the office

3
month

I got
promoted

Bought new
tractor with
closed cab
and heated
seat

Holidays
and
celebrating
in general

Barb lost
150 lbs due
to illness

Barb
just got a
new air
fryer!

Barb lives in
her 300 sq ft
"tiny home"
travel trailer

- What's the difference between a terrorist and a methodologist?
- You can negotiate with a terrorist.
- Is Andy a better picador than methodologist? You decide!
- A recipe for success
- One of several protagonists in the Siemens Lean Agile Center of Excellence

Metrics as “Lean Forms of Waste”, Mudas

A controversial thought? Most metrics are waste.

- More work than required “By Customer”
- Unnecessary efforts by people “Approvals, Reporting, Inspections”
- Follow metrics to unused talent

Metrics themselves can create ‘systemic’ defects, extra process steps, delays, an impetus for large batches leading to over production

“Watermelon Metrics”

“Vanity Metrics”

Modern Software Engineering cares about customers

- Heart Framework: Xin Fu, Kerry Rodden & Hilary Hutchinson
- Pirate Metrics: Dave McClure

Case Study - Thing on a Thing Inc.

We build a thing, you attach to things, to put them on the internet. Anything, Anywhere, that's our thing!

IOT Cyber-physical Systems connecting yesterday to today

Case Study - Thing on a Thing Inc.

We build a thing, you attach to things, to put them on the internet. Anything, Anywhere, that's our thing!

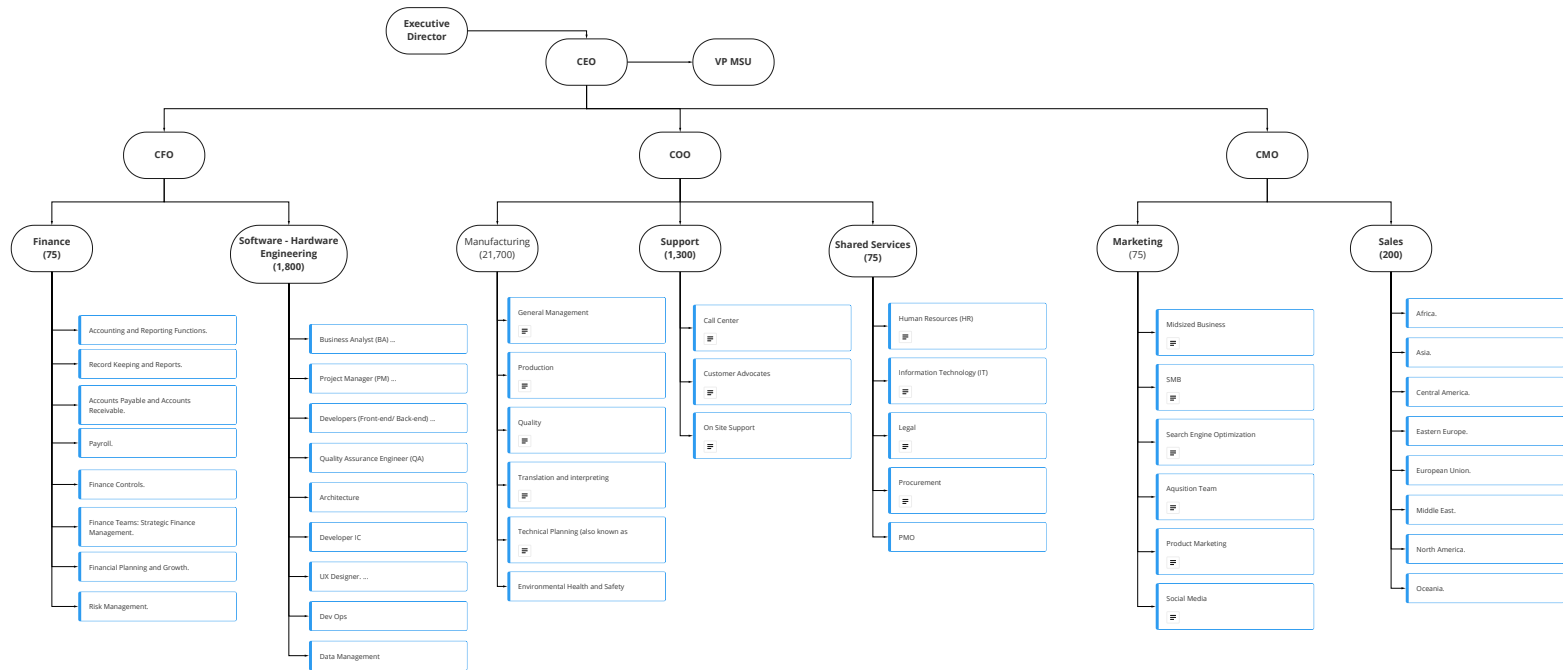

IOT Cyber-physical Systems connecting yesterday to today

Case Study - Thing on a Thing Inc.

We build a thing, you attach to things, to put them on the internet. Anything, Anywhere, that's our thing!

IOT Cyber-physical Systems connecting yesterday to today

"Thing on a Thing" is created!

A top ten Private Equity firm has acquired seven companies now under the new brand. On inception **"Thing on a Thing"** becomes a 5 B USD \$ Company serving everyone from the the fortune 25 to Mom and Pop creators of products and services. All need their products and services connected to the IoT to compete in the modern Digital Economy. **'Thing on a Thing'** could be on anything from a valve, to a toaster, to a heart monitor.

The formerly disparate People, Process, and Technologies now have a common goal!

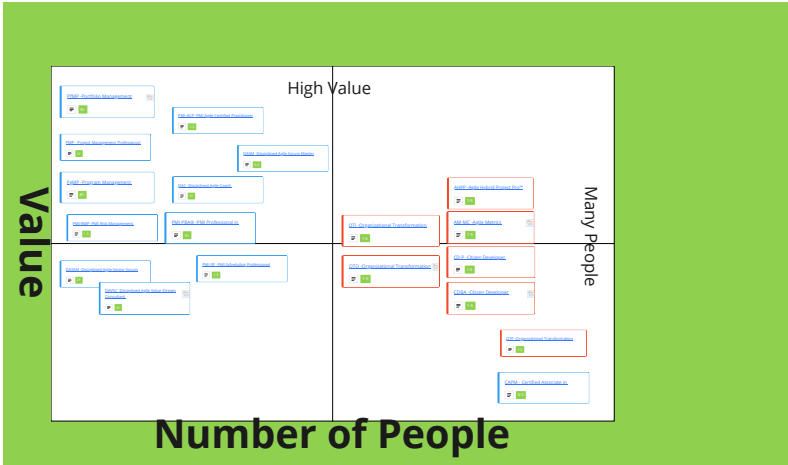

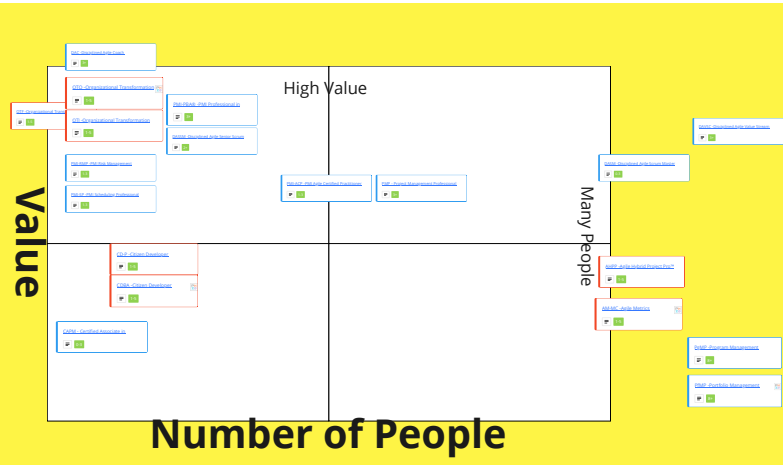

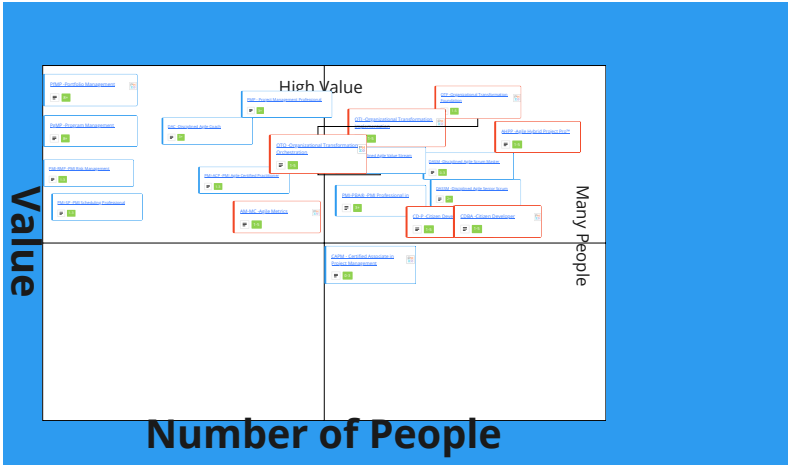

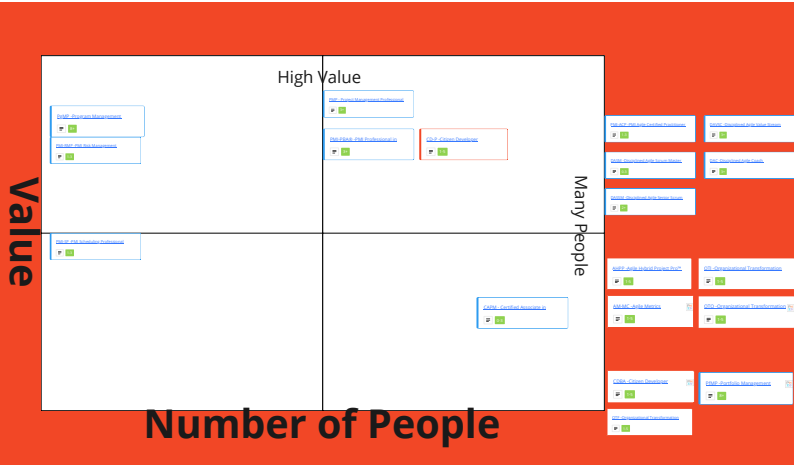

"Connect yesterday to today!"

The cyber-physical systems organization designs a device that can connect anything to the IoT. Software Engineering creates the interface APIs in a standard format. Manufacturing builds the physical connector and loads the custom operating system. The Services organization gathers requirements, deploys and configures the tool. The Support Organization troubleshoots problems for customers. Sales people bring in new ideas from customers and sell our products and services. Shares Services teams include Legal, Security, User Experience, L10N (Translation), and the full set of shared services organizations expected in a very large company.

The merged companies are currently aligned functionally. The CEO is willing to realign to value streams and has experience with lean transformations. Information must flow across silos. This is new to the companies, especially Manufacturing and Engineering which were stand alone companies. The CFO is keen to implement a Low-Code platform to digitize the company's workflow and data movement.

The merged companies have capacity to build the various 'Things on Things.' Sales and Marketing however need early and frequent access to prime the markets.

Though the company is relatively small, ~30K employees, the scope is very global. Private Equity is willing to spend money to make money. Life cycles from waterfall to 'fringe agile exploratory' are expected. The market is competitive, speed to market is critical!
